PROSPECTUS OF THE "NATIONAL MON-

UMENT,"

A weekly journal to be published in Washington,
under the sonction of the Washington National
Monument Society.

Monument Society.

JAMES C. PICKETT, EDITOR AND PUBLISHER.

The Monument is intended to be a literary, agricultural, and miscellaneous paper. It will contain selections of the literature of the day—the best that can be found in American and English publications: interesting scientificarticles, embracing mechanics; foreign and domestic news; a symposis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of adding in the erection of the noble column now rising on the banks of the Rotomac, in honor of the subscription of the subscription who venerates have a subscription of the completed. After feducating out of the subscription the expenses of the journal proposed to be published, the remaining funds will be faith fully applied, and with out reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so gastriction of all who are willing to contribute to so gastriction of all who are willing to contribute to so gastriction of the Subscribing to the Monument, a valuable Journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic magnorial of the Nation's gratitude.

The Board of Managers recommend My. Pickett, for merly Fourth Auditor of the Treasury and Charge d'Affairs to Peruc, who proposes to edit and publish the Monument Journal, as one well qualified to perform the duties of elitor, and to conduct the paper faithfully, and satisfactorily to the subscribes. They assume their fellow citizens that this enterprise is not a speculation got, up for individual smolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more, than a very moderate compensation for his services. Not one dollar, therefore, of the direct subscri

housand dollars.

The postmasters, and secretaries of all organized bodies houghout the Union, are respectfully requested to act as agents in obtaining subscriptions, thus aiding the great biject of our exertions.

As all editors and publishers, on account of the object for which the Monument newspaper will be established, must wish it to succeed, it is hoped that they will contribute to its success by publishing this prospectus. All moneys will be remited, and all letters and moneys eddressed prepaid, to the general agent of the Monument Society, Hon. Elishs Whittlessy, Washington.

OFFICERS—Millard Fillmore, ex-officer President; Arch. Henderson, First Vice President; Water Lenox, (Mayor of Washington.) Second Vice President; Thos. Carbery, Third Vice President; J. B. H. Smith, Tressurer; Geo. Watterston, Secretary.

Board of Managers.—Winfield Scott, N. Towson, Thos. Munroe, W. A. Bradley, P. R. Fendall, Walter Jones. Thomas Blagden, Peter Force, W. W. Seaton, M. F. Maury, T. Hartley Crawford, Benj. Ogle Tayloe, Elishs Whittlessy. Terms.—The Monument will be printed on a double royal sheet—the paper and type being of the best quality—and in quarto form, containing sixteen large pages, that it may be more easily preserved. The price will be two dollars per annum, payable on the receipt of the second number. The nature of the enterprise not admitting of any credit, none can be given.

Societies and clubs will be furnished with the Monument on the following terms: 3 copies for \$6:5 copies, \$3:10 copies, \$15: &c.

Those who are disposed to patronise the Monument are requested to forward their names to the General Agent.

The first n without delay. The first number will be published early in May, and the second on the second day of August, and workly thereafter; time being allowed for the Prospectus to be circulated, and for the agents to make returns. As all subscribers will be contributors to the Monument itself, their names will be published in the paper.

Austin's Magic Freezer,
Through in six minutes. For the preparation of
lee Creams, Water Ices, &c.—Patented Sep-

lee Creams, Water Ices, &c.—Patented September 19, 1848.

THE distinguising merits of this Apparatus are—
1st. The astonishing rapidity of the process, surpassing belief—hence the name.
2d. The Cream during the progress of freezing becomes charged with atmospheric air, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.
3d. It does not require a tenth part of the labor that the common Freezer does.

4th. It does its work better, producing a better article, in every respect, than by any other mode.
5th. There is a considerable saving in ice, as the tub needs no replenishing during the operation.
The annexed testimonial from the Proprietor of the Eutaw House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream in Austin's Magic Freezer, two quarts of Cream having been frozen in the incredible short time of six minutes, I chestfully recommend it to the public."

"This is to certify, that during the summer of 1848, I used one of Austin's Patent Ice Cream Freezers of the largest size, (IU gallons.) making from 10 to 80 gallons per day during the session; and so far as regards expedition and power, I consider it decidedly the best freezer now in use, as I have had with it no difficulty in making ten gallons of superior quality Ice Cream from fire of plain. Newark Academy.

Newark Academy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar institutions in the country. The Academy, heretofore microel in the College, and of course subjected to all the evils which have been found to attend the amalgamation of the two departments in the same building, and under the same government, now enjoys the privilege of a separate establishment, without losing those which result from its relation to the College proper.

A large and elegant edifice, with all the necessary fixtures of a complete boarding establishment, has been erected and furnished, in which the students of the Academy board, under the immediate charge of the Principal and his Ansistants; and all its exercises are conducted on a system of its own, uninterrupted by the interests or operations of the other department. The furniture of the study-rooms and dormitories has been chosen with peculiar reference to comfort and convenience for study; and no expense has been spared in providing the apparatus necessary to render the means of metraction complete; giving to Newark Academy facilities for private study and comfortable accommodation of students, fully equal to those afforded by many of our colleges.

From its intimate relation to the College, students of the Academy enjoy many advantages not generally obtained at institutions of this kind. Those who wish to pursue some particular branch which falls more properly within the College course, may be admitted to recite in any of the College fasces. Students also of proper age and discretion, by excommendation of the Principal, and permission of the Faculty, flay study the use of the College Library without additional charge. Admission also may be had to the Lectures, and such other privileges of the College is a can be profitably enjoyed by academical students.

have occurred among the pupils, and note single death
either here, or from diseases contracted while here.
The course of instruction instinces, besides the ordinary
English branches, Natural Philosophy, Chemistry, Physiology, History, Rhetoric, the various branches of Mathematics, and the Latin, Greek, and Fruench Lancaugers. Particular attention is paid to the higher Mathematics and
their application to Mechanics and Engineering; the hitter
and Surveying are taught practically by field operations,
with the use of appropriate instruments. Lectures on
Natural Philosophy and Chemistry, in which all the important principles are illustrated by experiments, arregularly delivered before the students.

As the object is to make the instruction as thorough
and practical as possible, no expense has been spared in
providing alitable apparatus. It is believed that, in thir
respect, the Institution will compare favorably with any
similar one in the country. A carefully selected library,
of more than one thousand volumes, containing works on
the various branches of Literature and Science, furnisheample reading matter; while a Laboratory, fully supplies
with isparatuse and tests, contains all that is necessary for
practical instruction in Chemical Manipulation.

The school year commenced on the third Second-day
(Monday) of the Ninth month, (September) and is divided
into four quarters of eleven weeks each, leaving a vacation
of two months, from about the middle of the Seventh
month (July).

THE TESTIMONY OF ONE OF OUR LAWYERS.—

Mr. JAS. L. HAMHITON.—DEAR Sm: Although the number and respectability of the testimonials of which you are already in possession, as to the efficacy of you Medicine, "THE GREAT VA. REMEDY," in the disease which it is designed to cure, are sufficient, in my opinion to establish its reputation, and secure for it such patronage as will adequately reward you for the discovery of so lines timable a Medicine—yet the great benefit which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from the unployment in the cases of several friends, to whom I had recommended it, constrain me to eductibute, for such use as you may think proper to make of it, this formal acknowledgment of its sanitary virtues My own case was Dyspepsias of tong duration, and vergagravated in its character, manifested by an almost total destruction of the digestive functions, great debility, ner aggravated in its character, manifested by an almost total destruction of the digestive functions, great debility, nervousness, emaciation, and impaired appetits, with pain and a burning sensation in the left side of the chest, palpitation of the heart, vertigo and congestion in the head and many other symptoms indicative of the worst type of the disease, by the use of three or four bottles of your preparation, been entirely relieved. The cases of my friends in which your Medicine was taken, were Dyspepsia, Chronic Headache, and Sore Throat, in all of which if provee efficacions, after the trial of a vast number of other remedies without benefit. Your medicine is as pleasant to the taste as a cordial, and in my experience corrects all derangement of the stomach, restores the wasted or enfeeble energies of the digestive organs, and imparts strength an reanimation to the whole system.

Gentlemen—In reply to your letter, I can with great sincerity say, that I entertain a very high opinion of threeent Exchequer Reports. In my judgment they are no excelled by any cotemporaneous Reports, in learning ability, or general utility and interest. The cases decide are discussed with great care, and expounded with uncommon force. I scarcely know of any volumes which I deen of more importance or value for a Professional Library.

CAMERIDGE, Laguary 25, 1845.

CAMSKIDE, JANUARY 25, 1846.

Gentlemen: Your letter of the 24th has been received in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equit and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours, SIMON GREENLEAF, Messars, T. & J. W. Johnson.

The following are a few of the many commendatory letters received by the editor of the Merchants' Magazine from distinguished statesment:

Letter from the Hon. Henry Clay.

Asstant, 20th July, 1842.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commencial Review, from viewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feed under obligations to these who have contributed to our information and amusement, we are naturally desirous to possess all the knowledge of them, of their appearance, of the features of their countenance, and of the character and habits of their mind, which we can acquire. You have piaced your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now hefore me, in some degree, satisfee the desire to which I have alluded.

I have become quite familiar with the Magazine and deview, and have ne hestitation in expressing my humble opinion that it is eminently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, inghity useful not only to the merchant, but to the statesman, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and leading community to price and obedient servant.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and qurity, by any in the United States. The house, recently spected at a cost of about seven thousand dollars, has been fitted up in a next and elegant style, at considerable extra expense, and is sufficiently expacious to accommodate seventy-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnastic exercises.

of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repuliated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have mperatively demanded "Reform." A return from 'we wide and fatal departure from the simplicity of Nature's laws is called for, alike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and curstive agent; is a practical substitution of a simple and remarkably ellevations mode of curing the sick; for that system of drugging, depleting, and cauterising, which, in obtaining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The success of the various Water Cure establishments in this country, to say nothing of any other, has fully confirmed the hopes of the early discoverers and promulgators of the great truths upon which the system is founded, and renders vertal communications unnecessary. It is deemed sufficient say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar character, and will be found equal to the best, as regards the order, convenience, and desirableness of the arrangements. The institution is now open for the reception of patients, and in full operation.
